

PGR112 – Step 1: Basics

Object oriented programming

Bogdan Marculescu / bogdan.marculescu@kristiania.no

Recording the lecture

Denne forelesningsøkten vil bli tatt opp og lagt ut i emnet i etterkant.

Hvis du ikke vil være med på opptaket:

 Start Video	La være å delta med webkameraet ditt.
 Unmute	La være å delta med mikrofonen din.
To: Marianne Sundby (Privately) Type message here...	Still spørsmål i Chat i stedet for som lyd. Hvis du ønsker kan spørsmålet også sendes privat til foreleser.

- You can start/stop the video. Only unmute when you have a question (there's a lot of you, and it would be difficult to manage).
- You can ask questions privately (I will repeat the question, but I will not point out the person, if the question is sent privately).

A quick word about me, Bogdan

- Teacher and researcher at Høyskolen Kristiania.
- Work and such
 - 2010: Master in Software Engineering from Chalmers.
 - 2017: PhD in Software Testing
 - 2018 - 2020: Research and programming (mostly Java and Kotlin) - EvoMaster.
- I have taught several courses, including Programming, Software Testing, Algorithms and Data Structures, Agile Methods, Enterprise Programming.

Today's exercise

- Installing IntelliJ IDEA
- Writing and running a “Hello World” program.
- (Next exercises will be more involved)
